
Product information

TIGEL G

Customs tariff number: 35051090

Code: 01608-T

Description

TIGEL V is a pregelatinized, cold- water swelling wheat starch. Selected wheat flour qualities and untreated spring water are the basis for the product.

Typical chemical and physical data

Moisture:	3- 10	%
Dry Matter :	90- 97	%
pH- value:	Approx. 4.0	
Protein (N*6,25):	Max. 5.0	%
Ash:	approx. 0.5	%
Density:	Approx. 430	g/l
Water binding capacity:	Min. 6.0	g/g

Application

- Pelletised fertiliser and minerals
- Liquid phytosanitary and fertilizing products
- Coal briquettes and wooden pellets
- Mould casting in the metal and plastics processing industry
- Adhesives and glues

Functionality

- Improvement of briquetting, pelletising and granulation properties of critical raw materials
 - Viscosity control and stabilization of liquid phytosanitary agents and fertilizers
 - Stabilization and strengthening of casting sand and moulds
 - Viscosity control and bulk material in adhesives and glues
 - Increased free- flowing properties
-

Dosage

TIGEL G regulates the moisture and binds large amounts of liquids. To achieve the required viscosity/ firmness an individual dosage of TIGEL G is needed.

Please contact us should you have any questions based on concrete applications.

Packaging

Paper bags each 25 kg net weight, 750 kg per pallet

Big bags with 900 kg net weight

Bulk tankers

Storage and Best off

Please store dry in original packaging.

In original packaging durable for at least 12 months after production date.

Lepiszczce Fluo-0 /TIEGEL certyfikowane naturalne do pelletu , agropelletu, brykietu

Stosowanie—od 0,25 % do 2 % w zależności od rodzaju surowca

Produkcja-Niemcy

Dystrybucja – Pabemia Grupa PGPI Sp. z o.o. 02-843
Warszawa, ul. Tukana 3a
